Mukul Dahiya

Devops Engineer | Web Developer

+919999849790 ◇ 1029mukul38@gmail.com ◇ Gurugram, Haryana, India ◇ LinkedIn ◇ LeetCode

SUMMARY

DevOps Engineer and Full-Stack Web Developer with hands-on experience in building and deploying cloud-native applications using AWS, Docker, and Jenkins. Skilled in setting up CI/CD pipelines, infrastructure as code, monitoring with Prometheus and Grafana, and secure deployments using best practices. Also experienced in developing modern, responsive web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Passionate about delivering scalable, efficient, and user-friendly solutions by combining DevOps automation with strong frontend and backend development skills.

PROJECTS

GeoAnalyzer Link
- Developed an innovative web and mobile application capable of analyzing and identifying lithology and geological discontinuities in drilled core samples. The application uses advanced image processing techniques to provide real-time analysis and mapping of predictions directly onto the samples.

E-commerce website Link
- Web-based application that allows businesses to sell their products or services online

Attendance Management System Link
- It is a web-based software application designed to help College to track the attendance of their students. The system is intended to automate and streamline attendance management processes, making it easier for administrators to monitor student attendance.

TraveLove – Full-Stack Flight Booking Web App, Freelancing Link Dec '24 — Jan '25
- Developed a responsive full-stack flight booking platform using React.js, Node.js, and MongoDB with features like real-time flight search, filtering, and secure booking. Integrated DevOps practices by setting up CI/CD pipelines using GitHub Actions and Docker for automated deployment and streamlined development workflows.

Liver Biopsy Histopathological Image Analysis with Deep Learning, Sozo Lab Link Feb '25 — May '25
Kitakyushu, Japan
- Designed an AI-driven pipeline to analyze H&E-stained liver biopsy images, enabling automated detection of nuclei, nuclear glycogen, and pathological structures. Implemented traditional image processing and deep learning methods (CNN/UNet) with OpenCV and PyTorch, optimizing accuracy for medical image segmentation and quantification.

Smriti – Smart Wearable Reminder System for Alzheimer's Patients May '25 Present
- Engineered a full-stack IoT-based smart wearable using ESP32, LVGL, and React Native to provide medication reminders, GPS tracking, and fall detection for Alzheimer's patients. Integrated BLE/WiFi data sync with a Node.js backend and MongoDB, and used WebSockets for real-time alerts, with CI/CD pipelines and Docker for seamless firmware and backend deployments.

Online Multiplayer Rock-Paper-Scissors Game Apr '25 Present
- Built and deployed a real-time game on AWS using complete DevOps practices: Terraform for infrastructure, CI/CD with Jenkins, Dockerized microservices, Helm deployments on EKS, monitoring with Prometheus & Grafana, secrets managed in AWS Secrets Manager, and logging with ELK Stack.

EXPERIENCE

Full Stack Developer intern Feb '23 — Apr '23
Innomatics Research Labs Hyderabad, India
- Achievements/Tasks Assisting with website development tasks such as coding, testing, and debugging. Participating in team meetings and project discussions. Learning and using web development technologies such as HTML, CSS, JavaScript, and jQuery

Frontend Developer Jul '23 — Jun '24
LETSGROWMORE
- Achievements/Tasks Created Student Registration Enrollment Form and Result Portal with the help of Reactjs and Mongo Db

Data Scientist Intern Jul '24 — Dec '24
MSTR Technologies Pvt Ltd Gurugram, India

Research AI Intern Feb '25 — Apr '25
Graduate School of Life Science and Systems Engineering, Japan. Kitakyushu, Japan
Certificate
- To develop a robust and accurate computational approach for the detection and analysis of liver diseases using digitized histopathological (microscopic) images of liver tissues stained with Hematoxylin and Eosin (H&E).

DevOps Engineer Jan '25 — Present
Self-Initiated | Remote | Jan 2025 – Present
Created end-to-end DevOps deployment of multiplayer game on AWS using IaC and CI/CD pipelines
Set up Prometheus & Grafana for real-time monitoring and ELK for centralized logging

SKILLS

Programming Languages C, Python, Java, JavaScript, SQL, C++, TypeScript , Data Structure, Algorithm, pandas
Web Development HTML5, CSS, MERN Stack, React.js, React Native, MongoDB, Components, Data Management, Express, Redux, React Router, Responsive Design, RESTful APIs, WebSockets, NoSQL, Vue.js, Sql
DevOps Containerization, Docker, CI/CD, EKS, AWS, Amazon S3, ELK Stack, Git, Github, Grafana, AWS IAM
Soft Skills Troubleshooting, Code Reviews, Adaptability, Problem-Solving, Team Collaboration, Agile/Scrum, SOLID Principles
AI Data Science, Machine Learning, Deep Learning, Python, Matplotlib, Seaborn, MLOps
Languages English, Hindi, Japanese

AWARDS

Winner of SIH 2023 Jan '23
Ministry of Mines, Govt. of INDIA

Top 10% of all participants in Innomatics Full Stack Development Internship Assessment Feb '23

Qualified 2 round of Flipkart gird 5.0

CERTIFICATIONS

National Creativity Aptitude Test

Top 10% in Innomatics Full Stack Development Internship Assessment Feb '23

Achieved 2nd place in 'InnoSpark: Igniting Ideas for Tomorrow,' earning a certificate for excellence.

Capture the Flag

Intership Certificate Ai, Kyushu Institute of Technology (Kyutech)

Introduction to DevOps, Great Learning

DevOps and Software Engineering Certificate, IBM - In Progress

EDUCATION

B.Tech in Computer Science and Engineering, Dronacharya College of Engineering (GPA: 7.9) Nov '21 — Jun '25
Gurugram, India

Senior Secondary , Scr public school (GPA: 84.36%) Gurugram, India

Matriculation, Our lady of Fatima convent school (GPA: 73.2%) Gurugram, India
